Belmont-Harrison Career Center Agriculture Classes

Agricultural & Industrial Mechanics (Diesel)

This program is the most comprehensive mechanic program available to students wanting an extensive range of knowledge within the mechanical field. Students learn engine rebuilding (gas and diesel), electrical systems (including computer), engine troubleshooting, hydraulic systems, welding, and fabricating.

(11th Grade - 12th Grade) BCC | HCC

Small Engine Technology

Students will work on various types of small engines, including lawn and garden equipment, motorcycles, ATV's, golf carts, outboard motors, and any other type of small engine driven machinery. Upon completion of the program, students can find employment anywhere small engine equipment is in use, such as, lawn and garden equipment dealers, boat dealers, farms, golf courses, parks, motorcycle shops, and construction sites. Placement of a student in this program will be determined by the Special Needs Supervisor according to guidelines set forth by the Department of Education

(10th Grade - 11th Grade - 12th Grade) BCC

Natural Resources

Students learn preservation and conservation of natural resources, waste disposal, recycling, and local problems and events affecting natural resources. The class spans such fields as agriculture science and mechanics, forestry, wildlife, recreation management, and soil and water. Most of the lab time is spent outdoors. This course includes a good deal of information covered in the Parks, Wildlife and Forestry programs at two year colleges
