Hiland Chestnut Ridge Jr. High School Agriculture Classes

Course Name: 8th Grade Exploratory Agriculture

Department: Science

Course Length: 9 Weeks

Course Number: 850

Course Description:

This course is designed as an exploratory 9-week course to introduce students to the broad components of our nation's largest industry. Did you know the average American eats 46 slices of pizza per year? Or did you know that a fresh apple will float in water because its volume contains 25% air? Students will take part in hands-on learning about what comprises agriculture and its importance to society. Students will also be exposed to the increasing amount of science and technology used in agriculture. Leadership and goal-setting skills are also taught.
